COMPLETE INTERIOR SOLUTIONS

- **partitioning**
- **suspended ceilings**
- **shop fitting**
- **mezzanine floors**
- **full turnkey**

Our project management team is able to provide a cost effective alternative which provides a complete advisory, CAD design, planning and site management service for all types of installations from a complex storage/handling scheme to an office refurbishment programme.

Once the design has been approved we have sourced the right materials, evaluated quotation, made our recommendations and placed orders. We then project manage the contract to successful completion.

SDE Ltd have the experience and expertise to undertake turnkey projects and have done this for such companies as Brantano, Partco, Arnold Laver, WH Smith News, Quinton Hazell. Working with these companies we have been commissioned to design warehouse layouts including racking, stock picking systems, conveyor systems and material handling equipment as well as designing office layouts.

Our expertise in this area is particularly important when we are asked to be involved with refurbishment in offices, warehouses, and retail outlets.

Since its formation in 1992, SDE has grown rapidly to become a major player in the storage and materials handling industry. Offering clients a complete service gearing to satisfying individual requirements, at competitive prices, is the hallmark to SDE's success. SDE's client base includes familiar names in widely differing industries, such as **Unipart, Arnold Laver, Focus Do It All, Cadbury Trebor Bassett.**

With partitioning systems to meet all needs and suit all aesthetic requirements from the purely functional to those offering high performance, our range caters for the needs of any specifier regardless of requirement or budget.

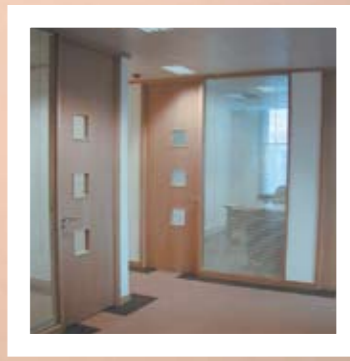

Precise and consistent quality are ensured by the meticulous engineering of framework components using the latest computer controlled machining and polyester paint technology.

All of the partitioning systems shown in this brochure are available from SDE on a national basis.

sde Ltd - the wise choice

partitioning

executive timber system

...the wooden framed partitioning system which brings warmth and sophistication to every installation...

The Executive Timber partitioning system has a nominal 108mm footprint.

The components are manufactured from machined MDF, with all visible surfaces faced with hardwood veneer and pre-finished with clear lacquer to enhance the durability of the materials and ensure a constant high quality. The use of veneered profiles gives a more uniform appearance than traditional timber systems.

Available veneer finishes are Oak, Ash, Maple and Steamed Beech. Clip-on joint trims and skirting and framework assembled using concealed brackets, all provides for simple dismantling and relocation when required.

Solid elevations can be constructed using galvanised steel stud system to be enhanced by the use of insulation material within the cavity. Glazed elevations utilise the skirting conceals an accessible wire-way within a glazing base profile.

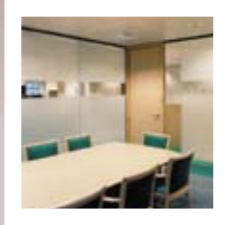

Performance & Characteristics

Fire Resistance:
Solid: 30 minutes insulation integrity
Glazed: 30 minutes integrity only
Doorsets: 30 minutes integrity only
Flame spread: Dependent on surface finish

Sound Insulation:
To BS EN ISO 140-3:1995 and rated in accordance with BS EN ISO 717/1:1997

Dimension
Thickness: 107mm
Module: 1200mm max
Height: 3000mm max
Doors: 44mm thickness

Glazing
Double glazed panels 6mm - 7mm thick, laminated or toughened glass. Complies with BS6206 and Building Regulations Part N

partitioning

- ... Minimalist design
- ... Single or double glazed options
- ... Unlimited glass manifestation options
- ... Purity of design and elegant detailing
- ... Integral blinds for privacy
- ... Visual freedom of the interior space
- ... Relocatability by use of clear pvc dry joints

executive glazed system

...the frameless glazing system which allows the penetration of daylight into the core of a building - a true design statement...

The framework comprises extruded aluminium profiles of minimal size that are unobtrusive to blend into the surrounding structure.

Two different head channel depths are available to suit both The Executive Aluminium and The Executive Timber for uniformity of detailing or feature glazed areas within solid walls. Purpose designed adaptor profiles for the conjunction of glazing to solid walls permit the transition to be made with ease where the provision of privacy in subdividing walls is a requirement.

Glass joints can be either traditional silicone or alternatively clear extruded pvc 'dry joints' which allows speedier completion and the ability to relocate. Doors can be incorporated as framed, frameless with patch fittings, or sliding dependent upon individual requirements.

Performance & Characteristics

Glazing

Single glazed 10mm - 15mm toughened glass,
Double glazed 6mm toughened glass, Double
glazed 6mm toughened glass. Complies with
BS6206 and building regulations Part N.

Dimension

Single glazed 10mm - 15mm toughened glass,
double glazed 6mm toughened glass. Complies
with BS6206 and building regulations Part N.

Simple, attractive design ...Acoustic & fire performance options ...single or double glazed available ...flexible & easy to install
choice of joints and detailing ...Integral blinds & manifestation options ...Available on a fast-track basis

executive aluminium system

...this flexible, popular system offers a multitude of design options combined with good sound and fire performance...

With either a 94mm (75mm system) or 119mm (100mm system) nominal footprint depending upon performance requirements. The System comprises a galvanised steel stud framework forming 1200mm wide modules, faced with either single or double layers of 12.5mm thick gypsum plasterboard. The cavity can be utilised for electrical or data communication services and infilled with insulation material to enhance the acoustic performance of the system.

The plasterboard faces can be decorated with a wide selection of wall coverings. For both non-fire rated and half hour fire rated construction glazed elevations utilise snap-in PVC glazing components available in white, black or grey colour ways to achieve single centre, single offset or double glazing configurations. Glass manifestations or interstitial horizontal blinds can be incorporated to satisfy aesthetic or privacy requirements. With exposed framing components and trim sections are predominantly extruded aluminium profiles, most of which are available from stock finished in either satin anodised, 'fast track' polyester powder coated White (RAL 9010) or Grey (BS 00 A 05) in common sizes.

Alternatively standard colours are available to meet innovative requirements or the system can be custom coated to suit specific client needs. Joint options comprise standard cover trim or omega top hat section with PVC infill for expressed joint lines, pencil-line with concealed clip fixing for a monolithic appearance, or taped and filled flush joints for a seamless finish.

Performance

Fire Resistance:

Solid: 30 minutes insulation & integrity
Glazed: 30 minutes integrity only
Doorsets: 30 minutes integrity only
Flame spread: Dependent on surface finish

Sound Insulation:

To BS EN ISO 140-3:1995 and rated in accordance with BS EN ISO 717/1:1997. Up to 45dB Rw

Glazing

Up to 7mm max, laminated or toughened glass. Complies with BS6206 and Building Regulations Part N.

Dimension

Thickness: 94mm or 119mm
Module: 1200mm
Height: Variable
Doors: 44mm thickness

composite system

...a simple, economical and attractive solution to the relocatable division of working environments...

The Excel Partitioning System has a nominal 60mm overall footprint.

Excel comprises lightweight aluminium framing with gypsum plasterboard honeycomb panel or hardboard faced flaxboard panel infill for solid elevations, which can be decorated with a wide selection of wall coverings.

Glazed elevations utilise snap-in PVC glazing components available in white, black or grey colour ways to achieve single centre, single offset or double glazing configurations.

Glass manifestations or interstitial horizontal blinds can be incorporated to satisfy aesthetic or privacy requirements. Excel framing components are extruded aluminium profiles, most of which are available from stock finished in either satin anodised, 'fast track' polyester powder coated White (RAL 9010) or Grey (BS 00 A 05) in common sizes. Alternatively a standard range of colours is available to meet innovative requirements or the system can be custom coated to suit specific client needs. Doorframes and corner posts are available as either square or rounded profiles.

Attractive, economical partitioning ...Single or double glazed options ...Unlimited glass manifestation options ...Integral blinds for privacy ...Quick and simple installation
Fully relocatable

Performance

Glazing

Up to 7mm max, laminated or toughened glass. Complies with BS6206 and Building Regulations Part N.

Dimension

Thickness: 60mm
Module: 1200mm
Height: Variable
Doors: 44mm thickness Cellular Core

suspended ceilings

Our ceilings are designed for use in all types of public or private buildings, whether new build or refurbishment, commercial or industrial.

The range provides aesthetic and performance options for health and educational buildings, hotels, entertainment and leisure, prestige office, general offices and every type of retail outlet in the high street or shopping centre.

shop fitting/turnkey packages

SDE Limited offer a turnkey (project management service) on the following...

- ... Trade counters (Bespoke)
- ... Slat wall
- ... Partitioning
- ... Flooring
- ... Display cabinets / uniting
- ... Ceilings
- ... Electrical installation
- ... Air conditioning

furniture

SDE Ltd currently offer a wide range of office furniture to suit all your needs...

Executive Economy Table / chairs Storage Ergonomic desking Flooring Reception desks

commercial decorating

- ... Interior
- ... Exterior
- ... Vinyl
- ... Spray
- ... Commercial
- ... Industrial
- ... Shops / schools

- ... Warehouse flooring
- ... Epoxy resin flooring
- ... Anti-slip
